Features

- Used with threaded fasteners (for example a bolt and a nut)
- Designed to increase the area of load distribution
- Larger outer diameter makes this washer ideal for spreading tightening forces over a greater area than a conventional washer
- Manufactured from A2 stainless steel, they are ideal for external - as well as internal use, offering fantastic resistance against corrosion
- Conforms to DIN 9021 specifications

RS PRO Stainless-Steel Washers - DIN 9021

RS Stock No.:
7976257,7976250,7976254,7976263,1933486

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

- *Used with threaded fasteners (for example, a bolt or a nut), they are designed to increase the area of load distribution. When the threaded fastener is tightened, there is a risk of the surface becoming stressed. A washer helps spread the tightening forces applied over an even and increased area, reducing the risk of surface stress and damage. This washer has an outer diameter approximately three times greater than the inner diameter - enabling it to spread the tightening forces over a greater area than a conventional washer. Manufactured from A2 stainless steel, they are ideal for external - as well as internal use, offering fantastic resistance against corrosion. These washers conform to DIN 9021 specifications.*
