

Crisben Durapallé®-IBC – IBC Spill Pallet

Product code : Durapalle - IBC

Durapallé®-IBC is designed to provide a secure secondary containment facility for an IBC tank and compliant to **Regulation 9 of the EQA 1974**. The **removable non-slip grate** and **easy drain threaded sump plug** ensure ease of use.

It is made from **100% virgin resin polyethylene** using rotational molding. They are **fully recyclable** but contain no recycled contaminants that can compromise strength, chemical resistance or load bearing capacity.

As well as minimizing risks to safety and the environment, this spill pallet will ensure that legal obligations are met.

Max. load
3000 kg

Sump capacity
1300L

Comes with
Drain Plug

Length: 1350mm
Width: 1350mm
Height: 900mm

Removable
non-slip grating

Pallet weight
73 kg

Safety usage guidelines:

1. To maximize the sustainability of the Durapallé®, it is highly recommended to load drums on a wooden/plastic pallet first before placing on top of Durapallé®.
2. Do not overload beyond specifications.
3. Floor surface must be flat and free from any debris before placing Durapallé® to avoid any potential damages or cracks.
4. Durapallé® should not be place outdoors without shelter or near any heat source for a long term, inline with the guideline by DOE, Reg. 9, clause 5.0
5. Discoloration may occur from the staining from liquid and UV degradation. Prolonged UV exposure may also cause plastic to degrade rapidly.
